Subject: CRU - Radiological Validation Report - 1st Batch
Attachments: CanadianRadium_30179165RadiologicalValidationReport.pdf

Dan,
Please find attached the Radiological Validation Report for the first group of soil samples collected from the CRU Site in April 2016. The following validation report summarizes the 52 soil samples and two rinsate blanks collected from the Site which were submitted to the RST 3-procured laboratory (Pace Analytical). Rick Haaker, the Weston CHP, is now going to start the validation of the second batch of samples which were analyzed through the NAREL laboratory. I will be putting together a supplemental Specialized Labor cost estimate to cover the validation of the next group of samples which I anticipate sending to you today for approval. If you have any questions or comments please let me know and I will coordinate with our CHP.

Thanks,

Timothy Benton, CHMM
